## What is Claimed is:

- 1. A display device comprising:
  - a rack;
  - a first display panel mounted to the rack; and
- a second display panel overlying a portion of the first display panel, whereby at least a portion of the first display panel extends beyond an edge of the second display panel.
- 2. The display device of Claim 1, wherein the second display panel has at least one aspect differing from a corresponding aspect of the first display panel.
- 3. The display device of Claim 2, wherein the second display panel has at least one dimension that is smaller than a corresponding dimension of the first display panel.
- 4. The display device of Claim 2, wherein the second display panel has at least one opening through which a portion of the first display panel is visible.
- 5. The display device of Claim 2, wherein the second display panel has a different shape than the first display panel.

- 6. The display device of Claim 1, wherein the first display panel is wider than the second display panel.
- 7. The display device of Claim 6, wherein the first display panel is also taller than the second display panel.
- 8. The display device of Claim 1, wherein the first and second display panels are pivotally mounted to the rack.
- 9. The display device of Claim 1, wherein the rack further comprises at least one fixed display surface.
- 10. The display device of Claim 1, comprising at least three display panels, each of the display panels having at least one dimension greater than a corresponding dimension of any overlying panels.
- 11. The display device of Claim 1, comprising at least two arrays of display panels, each array comprising at least two display panels.
- 12. A set of display panels for use in a display device, said set comprising at least two display panels, wherein a second display panel of the set can overlie a portion of a first display panel of the set while leaving another portion of the first display panel uncovered.

- 13. The set of display panels of Claim 12, wherein each display panel comprises a coupling for pivotal attachment to a display rack.
- 14. The set of display panels of Claim 12, wherein the second display panel has at least one dimension that is smaller than a corresponding dimension of the first display panel.
- 15. The set of display panels of Claim 14, wherein the first display panel is wider than the second display panel.
- 16. The set of display panels of Claim 15, wherein the first display panel is also taller than the second display panel.
- 17. The set of display panels of Claim 12, wherein the second display panel has at least one opening through which a portion of the first display panel is visible.
- 18. The set of display panels of Claim 12, wherein the second display panel has a different shape than the first display panel.

19. A display method comprising:

providing a first display panel having a first display surface; and providing a second display panel having a second display surface, the second display panel overlying the first display panel but leaving a portion of the first display surface visible.

20. The method of Claim 19, further comprising pivotally mounting the first and second display panels to a display rack.
